We've helped 30+ partners, ranging from startups to medium-sized businesses to **achieve their goals.**

Enhancing Experience With Enhanced Technology

UI/UX Design

Our UI/UX design services ensure that every AR and VR application we develop delivers a seamless and intuitive user experience, enhancing engagement and usability

Full Stack Application development - iOS, Android and Web Applications

- Industry standard, best practice Web technologies to code your site with HTML/CSS/JavaScript.
- Fully responsive and tested across all modern devices.
- Contact form with success message notification, so prospects know you have received their message.

MERN Stack Application Development

Using the MERN Stack (MongoDB, ExpressJS, ReactJS and NodeJS) Application Development.

Enhancing Experience With Enhanced Technology

Augmented Reality (AR) Applications Development

From concept to deployment, we offer end-to-end AR app development services, leveraging the latest technologies to create captivating augmented reality experiences.

Cloud Deployment

Data deployment and interaction with cloud (Amazon AWS/ Google Cloud Platform/ Microsoft Azure).

Virtual Reality (VR) Applications Development

Our VR app development services enable brands to transport their audiences to virtual worlds, providing immersive and interactive experiences that leave a lasting impression

Case Studies

Website Design and Development

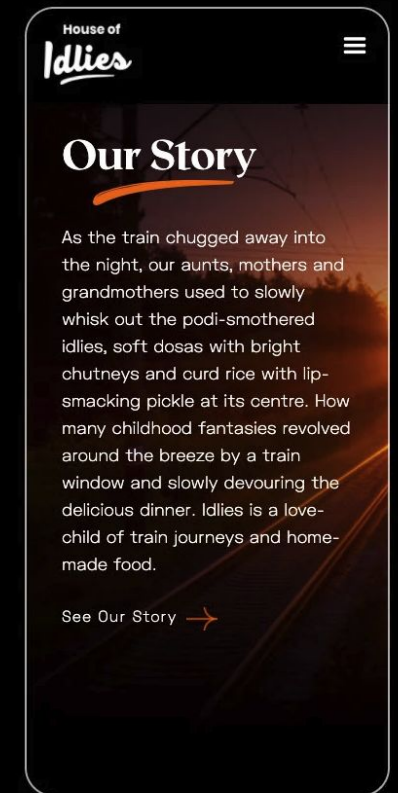

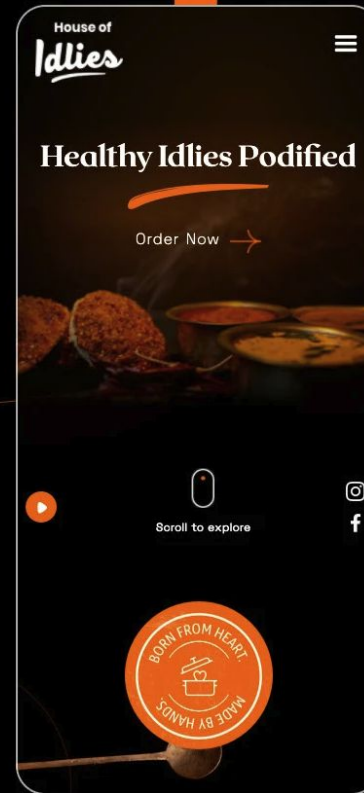

House Of Idlies

We designed and developed the House of Idlies website to showcase their unique food brand with a clean, modern UI and engaging visual storytelling. The site highlights their product offerings, brand philosophy, and social impact, providing an immersive digital experience for conscious food lovers.

BOWL'D

Bowl'd was started in October, 2016.

As the name goes, the idea of Bowl'd is to bring in everything under a bowl (incorporating the demand for healthy meals) that made for quick and healthy food options as to some idli bowls. Bowl'd was born from our first trend - idli.

Idlies

Of all things, why start a venture on Idlies?

The most precious things in today's world are Time and Health. While we all are racing against time, we prefer to grab a quick bite at anything that is tasty and filling.

Idlies was conceived with the idea of reaching to people not just food that is tasty, but also that is traditional and healthy.

The childhood brain-journeys in which we used to carry idlies cooked in Mugga Pakk and wrapped in banana leaf, we thought, why the most apt product to launch as one can have it anytime and the later they have it, the more delicious it would be.

Thus, began Idlies.

regun Journey begun Jour

2016

Our journey started

We started this journey and Madhav Coffee House was our first partner who helped us launch it. Initially, my Mom, Aji and me cooked them and packed them and delivered them to outlets of Madhav Coffee House and since we saw the local Chennaiites welcomed it, we need other Mom's to produce more.

Starting with a standard life that contains had other with Missgeppal, later on we started home deliveries and finally where

Fullfly

Fullfly is an end-to-end tech-enabled Electric Vehicle (EV) renting and delivery service platform. Our goal at Fullfly is to ensure the reduction of carbon emissions across the country, and we offer pollution-free delivery services with our EVs to make that happen. In addition to that, we also have tied up with some delivery services and local merchants to spread our initiative across to a broader range of people.
